Anesthesia:
**Kaiser Anesthesia**
Contact: Quinn Stevens, MD or K Berger, MD  
    303.764.5230

Cardiology:
**Kaiser Cardiology**
Clinical exposure to consultative and outpatient cardiology as well as cardiac catheterization conferences with plan individualized based on resident requests. There are opportunities for exposure to echocardiography, stress testing and EP for those with more specialized interests. The ECG reading - Cardiac Diagnosis seminar course is available for those who have not already taken this course while a student --- focused on those who desire to improve their ECG analysis and cardiac exam skills.
Contact: Michael L. Fisher, MD  
    NJH-SJH Hospital and KP Cardiology Clinic (Franklin Building)  
    303-902-4997 (call or text)  
    MLF2932@gmail.com

Dermatology:
**Dermatology of Cherry Creek**
The objective for the resident is to see full body checks to determine when a biopsy is necessary. See common dermatologic conditions and how to treat: acne, rashes, warts, hair loss etc. Learn dermatologic procedures: biopsies, liquid nitrogen freezing, excisions, some cosmetic treatments.
Contact: Adrienne Stewart, MD  
    3300 East 1st Ave, suite 400
Kaiser Dermatology - On HOLD until August 2016
See common dermatologic conditions and how to treat: acne, rashes, warts, hair loss etc.
Learn dermatologic procedures: biopsies, liquid nitrogen freezing, excisions.

Hospitalist Medicine:

**Midtown Internal Medicine (MIM)**  
Experience what it is like to work as a dedicated hospitalist. Rotation will include working evening shifts. Based at Lutheran Medical Center.

Contact: Lisa Kettering, MD

Infectious Disease:

**Infectious Disease Consultants**  
Contact: Ray Blum, MD  
Claudia Arambula, Office Manager  
303.831.4774  
carambula@idcdenver.com

**Kaiser Infectious Disease**  
Students will be responsible for diagnosing and treating a breadth of infection on the infectious diseases service at St. Joe's Hospital. They will become familiar with the appropriate treatment and microbiology of common hospital pathogens and antibiotic stewardship in the hospital setting. Additional emphasis will be placed on understanding microbiological techniques which help guide therapy decisions. A literature review and short presentation on a pertinent ID topic of interest is required.

ryan.j.oyer@kp.org
Internal Medicine:

**Caritas Clinic**
Primary Care experience can be individually tailored to meet your objectives. This is separate from your required Caritas month rotations.
Contact: Karen Weber, DO
karen.weber@sclhs.net

**Denver Medical Associates**
The resident physician will be exposed to an outpatient setting where he or she will be able to see patients and learn to diagnose and treat common outpatient medical problems. The resident will work one-on-one with several physicians and be exposed to different management styles that will help prepare him or her for real world outpatient medicine.
Contact: Mark Nelson, MD
1960 Ogden St, Suite 120
Denver, CO 80218
720.841.4935
Mark.Nelson@sclhs.net

**Wheat Ridge Internal Medicine**
Experience Primary Care outpatient medicine in a well-established practice with a focus on managing chronic medical issues.
Contact: Julie Chappell (Office Manager)
303.709.6766
jchappell@wrimdocs.com

**Kaiser Outpatient Internal Medicine**
Training experiences in varied clinical settings with different patient populations and utilizing various health care delivery systems are important to the success of internal medicine graduates. The elective rotation with Colorado Permanente Medical Group (CPMG) provides additional experience in outpatient medicine in an integrated delivery system where there is a focus on quality and managing costs using prevention, population-based disease management, and an evidence-based approach to physician prescribing and treatment practices.
Contact: Camille Wright, MD
Department of Internal Medicine
Colorado Permanente Medical Group
720.348.4308
camille.S.Wright@kp.org

**IR:**

**Interventional Radiology**
The rotation is to educate the resident on the scope of IR in an outpatient and inpatient environment. The resident will field consults, perform pre and post op care, and be trained in the performance of basic IR procedures. At the conclusion, the resident should have significant improvements in basic ultrasound skills, perform image guided paracentesis, thoracentesis, and central venous access. The resident should read and prepare for more complex interventions and participate in these cases during the rotation.

ELECTIVES

johnsonstephen@mac.com

Nephrology:

**Denver Nephrology**
The one month Renal elective will focus on inpatient consultative nephrology at St Joes, but also with opportunities to shadow attending physicians in the outpatient clinic and outpatient dialysis unit. In hospital, the residents will have their own panel of patients to pre-round on in the mornings, to be followed by rounding with the attending.

CPMG Area Practice Manager
audrey.Keller@kp.org

Rural Medicine:
**Southwest Internal Medicine - Cortez Colorado**
Residents would learn what practicing Internal Medicine is like in a rural area with few specialists available. We currently see patients in the office only (we previously also did hospital rounds), but do oversee cardiac stress testing, and interpret PFT's, Holters and EKG's for the local hospital. Additionally they would learn what a traditional private practice is like.
